

SUMIT ANAND

CCTV Operator & Networked Security Systems Specialist

Phone: +91 7206185384 | Email: sa8518430@gmail.com | Location: Rohtak, Haryana, India

PROFESSIONAL SUMMARY

Vigilant and technically skilled CCTV Operator & Security Systems Specialist with 2+ years of core experience managing security operations, IP surveillance networks, digital entry/exit verification, and physical access control in large-scale logistics hubs. Proficient in CP Plus CCTV systems, NVR/DVR IP networking, IPv4 addressing, subnetting, router/switch configuration, TCP/IP fundamentals, digital GIGO data logging (MS Excel, Google Sheets), and CLI diagnostic tools (cmd, ping, ipconfig). Recognized for maintaining zero-incident operational accuracy, high network uptime, and rapid escalation in high-throughput warehouse environments.

CORE COMPETENCIES & TECHNICAL SKILLS

- **IP Networking & Infrastructure:** IPv4 Addressing, Subnetting, Routers & Switches Configuration, TCP/IP Protocols, LAN Setup, Port Forwarding, Static & Dynamic IP Configuration, Network Diagnostics (ping, ipconfig, tracer).
- **Surveillance & CCTV Systems:** CP Plus Equipment Setup, NVR/DVR Network Integration, Live Multi-Channel Monitoring, Footage Playback & Archiving, Camera Maintenance, Incident Flagging.
- **Computer & Technical Tools:** Command Prompt (cmd), Terminal basics, Git Version Control, MS Office Suite (Excel, Word, PowerPoint), Google Sheets, GIGO Verification Tools.
- **Gate & Access Control:** High-Volume Vehicle Log Management, Material & Dock Verification, Visitor Access Authorization, Badge Inspection, Digital Entry/Exit Systems.
- **Compliance & Safety:** Loss Prevention Protocols, Fire Safety & Evacuation Drills, Industrial Security Guidelines, Emergency Escalation Procedures.

PROFESSIONAL EXPERIENCE

Security Systems & Gate Control Operator

2025 – Present

Innovision Limited (Client Site: Flipkart Kalash Warehouse - Mega Hub) | Patli, Haryana

- Manage end-to-end gate security operations, digital GIGO systems, and IP-based surveillance feeds for India's largest Flipkart hub, accurately processing high-density vehicle and personnel logs daily.
- Oversee network connectivity for local CCTV cameras, NVRs, and surveillance switches; configure IP addressing, subnet parameters, and router links across warehouse security zones.
- Execute real-time data entry in MS Excel, Google Sheets, and logistics tools for all inbound/outbound commercial vehicles, delivery fleets, and inventory transfers with 100% data accuracy.
- Perform active surveillance and network diagnostic checks (ping, ipconfig, link troubleshooting) to ensure 24/7 video uptime, prevent stock shrinkage, and enforce safety compliance.
- Coordinate directly with site shift managers, IT support teams, and safety officers to resolve gate queue bottlenecks, technical connectivity issues, and security anomalies immediately.

Security Guard & Surveillance Operator

2023 – 2024

A.P. Securitas Pvt. Ltd. (Client Site: Ekart Logistics Pvt. Ltd.) | Haryana, India

- Monitored multi-camera CCTV feeds, managed DVR/NVR video recording channels, and enforced facility safety standards in accordance with industrial security regulations.
- Utilized CLI diagnostic commands (cmd / ipconfig) and router interface tools to support network connectivity for surveillance workstations.
- Utilized cloud spreadsheets (Google Sheets / Excel) for efficient system navigation, visitor verification, and digital shift reporting.

- Conducted regular floor patrols, inventory spot checks, and fire safety inspections to safeguard company assets and personnel.
- Operated emergency response equipment, participated in scheduled fire drills, and maintained concise daily shift logs for management review.

EDUCATION & QUALIFICATIONS

Degree / Course	Institution / Board	Year / Status	Details
Bachelor of Commerce (B.Com)	Distance Education University	Pursuing (Final Year)	Accounting & Business Data Management
Senior Secondary (12th)	B.S.A.M. Panchtirthi Sr. Sec. School (CBSE)	2020	Scored 79% Marks

CERTIFICATIONS & TRAINING

- **Networking & IP Surveillance Fundamentals:** Practical training in IPv4 addressing, subnetting, router/switch setup, NVR/DVR network integration, TCP/IP protocols, and CLI diagnostic commands.
- **CCTV & Technical Systems Training:** Hands-on experience in CP Plus surveillance equipment configuration, camera installation, playback analysis, and maintenance.
- **Computer & Version Control Fundamentals:** Command Prompt (cmd), Terminal basics, Git version tracking, and cloud collaboration via Google Sheets.
- **Fire Safety & First Aid Training:** Emergency evacuation procedures, fire extinguisher operation, and workplace CPR certification.
- **Computer Basics & Office Automation:** Proficient in MS Office Suite (Excel functions/formulas, Word document creation, email correspondence) and web productivity tools.
